

What data would you like to see about Access?

who is getting turned away without an assessment and why

Would like to know where people aren't getting access to assessments or in general CE?

How many people by population, are entering our system monthly/quarterly?

how many people show up in shelter/drop-in/outreach etc? how many people are assessed? racially disaggregated data for all this

Who is assessing (what agencies and how many)?
Who is being assessed -- singles, youth, family?
Racial demographics of people being assessed and how it compares to the overall racial demographics in our system.

Numbers waiting for housing and specifics regarding demographics.

Where are the gaps?

Would there be a place in HMIS to record a lack of follow up or a turnaway reason?

How long between their assessment and their first follow up?

What data would you like to see about Access?

With "turn-away" data I'd be curious why they were turned away but also if we were able to recommend other resouces/phone numbers that could serve them. "No wrong door" model

demographics of those being put on the list
demographics of those not being put on the list
locations of access points- how many or types of households

How many LTH are not in the pool that need housing
(Step One data)

What else would you like to see on a regular basis?

Urgent needs? My program sometimes has extra funds and if we knew that there was an urgent need we could exceed our normal count to help.

Is there a place where providers could go for comprehensive reference on the CE process in its entirety?

Information about single adults.

Data broken down by county so we can help inform our elected officials. How many people are not in the pool but assessed with step 1. Tracking those over 65

during the assessor training or re-training, time to just talk about challenges, questions clients ask, it would be good to hear how staff work through things and get your directions.

CE Workshops have been replaced by quarterly Q&As/consultations for Assessors and RRH case managers. Is there something else we should do?

quarterly updates by housing type via zoom by CES staff

Getting assessors and housing providers together to collob

I think this has been good. I think, that like our clients it is easier to blow off these types of meetings during covid, but attendance will be good when we get back. Or we can just really push that this needs to be a priority.

I second the idea of connecting providers and assessors.

I've been participating in consults in Hennepin for chronic folks who've been referred but not yet housed (includes housing providers, shelters, outreach, etc) I wonder if there's interest in this here.

I think the quarterly Technical Assistance opportunity for assessors, RRH, others, should continue. Is there something similar planned, or at least desired, for CE training, or could those be blended?

Refreshers on the most important parts of the process like taking housing history. (This is good for me as a non-assessor too!)
